Hong Kong

3rd October, 2017.

Dear Value Customers

European REACH Registration Status of Propylene Glycol USP/EP

This letter is in response to your inquiry regarding the products your company purchases directly or indirectly from The Dow Chemical Company and/or its subsidiaries. The following information should answer your inquiry concerning our product namely: Propylene Glycol USP/EP.

Propylene Glycol USP/EP which sourced from our Map Ta Phut, Thailand plant is registered in European REACH. The registration number of this substance is 01-2119456809-23-0043.

Though our Thailand sourced Propylene Glycol USP/EP is registered, please note that:

REACH obligations to (pre)register are with the manufacturers in the Europe (EU) and/or importers of substances in the EU. Therefore, the fact that Dow has registered substances which Dow manufactures and/or imports into the EU, may not satisfy the REACH obligation for other importers of the same Dow substance(s).

For Dow substance(s) contained in products you manufacture outside of the EU and want to export to the EU, there are several options:

- Your own importing Legal Entity in the EU can (pre)register the imported substance(s) and your EU based customers will purchase the product from your legal entity in the EU.
- Your importing EU based customer(s) (pre)register the imported substance(s) themselves.
- You can appoint an Only Representative.
- According to the latest (announced) interpretation of the Only Representative rules, if Dow has decided to appoint an Only Representative to cover our own imports, it might be possible that, in some cases and subject to specific conditions, you may be able to use this Only Representative to cover your exports of Dow substances to the EU. Please contact your Account Manager or **DOWCIG@DOW.COM** to indicate your interest to discuss this possibility with us. By expressing your interest in this alternative, we will contact you soon.

I hope this information is helpful. Thank you for your interest in Dow products.

Yours Sincerely,

Wilson Choi
EH&S Product Stewardship Manager
